

ASSIGNED

No. **58043**

**APPLICATION FOR PERMIT
TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA**

Date of filing in State Engineer's Office SEP 03 1992

Returned to applicant for correction _____

Corrected application filed _____

Map filed SEP 03 1992 under 58041

The applicant Rabbit Creek Mining Incorporated

Post Office Drawer 2220, of Winnemucca,
Street and No. or P.O. Box No. City or Town

Nevada 89446-2220, hereby make S application for permission to appropriate the public
State and Zip Code No.

waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.) January 12, 1989 in the state
of Delaware.

1. The source of the proposed appropriation is underground.
Name of stream, lake, spring, underground or other source

2. The amount of water applied for is eight (8) second-feet
One second-foot equals 448.83 gals. per min.

(a) If stored in reservoir give number of acre-feet not applicable.

3. The water to be used for mine dewatering.
Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.

4. If use is for:

(a) Irrigation, state number of acres to be irrigated _____

(b) Stockwater, state number and kinds of animals to be watered _____

(c) Other use (describe fully under No. 12. "Remarks") see No. 12.

(d) Power:

(1) Horsepower developed _____

(2) Point of return of water to stream _____

5. The water is to be diverted from its source at the following point NE 1/4 SW 1/4 Section 19, T.39N., R.43E.,
Describe as being within a 40-acre subdivision of public

M.D.B.&M. or at a point from which the NE corner of said Section 19 bears N
survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated.

45° 45' E 5450.0'

6. Place of use Sections 19, 20, 21, 28, 29, 30, 31, 32, 33 of T.39N., R.43E.,
Describe by legal subdivision. If on unsurveyed land, it should be so stated.

M.D.B.&M.

7. Use will begin about January 1 and end about December 31, of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Well, pump, motor and distribution system.
State manner in which water is to be diverted, i.e. diversion structure, ditches and

flumes, drilled well with pump and motor, etc.

9. Estimated cost of works.....\$100,000.00
10. Estimated time required to construct works..... is two years.
If well completed, describe works.
11. Estimated time required to complete the application of water to beneficial use..... is five years.
12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use:
Water from this location is for mine dewatering without consumptive use. The water will be treated on site and discharged to the Humboldt River via Rabbit and Kelly creeks. NPDES Permit NV0021725 as issued by the Nevada Division of Environmental Protection Water Pollution Control Bureau is in place and will expire 11/16/95.

Protested 12/31/92 by; LaVar Murdock, dba Adams Peak Properties:

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.
(CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 5.0 cubic feet per second

Work must be prosecuted with reasonable diligence and be completed on or before May 19, 1996
Proof of completion of work shall be filed before June 19, 1996
Application of water to beneficial use shall be filed on or before May 19, 1998
Proof of the application of water to beneficial use shall be filed on or before June 19, 1998
Map in support of proof of beneficial use shall be filed on or before N/A

Completion of work filed.....
Proof of beneficial use filed.....
Cultural map filed.....
Certificate No.....Issued.....

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.
State Engineer of Nevada, have hereunto set my hand and the seal of my
office, this 15th day of February
A.D. 1995
R. Michael Turnipseed, P.E.
State Engineer

(PERMIT TERMS CONTINUED)

This permit will allow the permittee to dewater the pit area.

It is understood that any water pumped as a result of the production and dewatering operation shall be used first by the permittee for mining, milling, heap leaching, drilling, road watering and other related mining uses hereinafter referred to as mining and milling uses within the described place of use on this permit.

The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights. Any water pumped and not used for mining and milling purposes shall be injected or infiltrated back to the Kelley Creek Groundwater Basin. The design of the infiltration system or other disposal method and the delivery system to the site shall be submitted to the State Engineer for approval prior to any diversion of water. The permittee shall discharge water in a manner to achieve maximum conservation of the water resource. It is understood that this right must allow for a reasonable lowering of the static water level.

The State Engineer will retain the right to require additional monitoring of the water levels in observation and monitor wells and of the flow rates of surface sources. The permittee, on a schedule acceptable to the State Engineer, shall prepare and present an update on the activities of the mine and the monitoring on a periodic basis, but not less than two times per year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate land.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from the State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The total combined duty of water for consumptive purposes under Permits 49633, 49634, 50853, 50854, 52046, 52047, 52048, 52049, 52050, 52051, 53339, 53340, 53341, 58042, 58043, 58044, 58045, 59012-T, 59202-T, 59203-T, 59220-T, 59348-T, 59349-T, 59386-T, 59387-T, 60048, 60049, 60050, 60051, 60052, 60053, 60054, 60055, 60056, 60057, 60058-T, 60259-T, 60374-T, 60679-T, 60680-T and 60681-T shall not exceed 6,121.0 ACRE-FEET ANNUALLY. The total combined diversion rate of the above referenced permits shall not exceed 30.75 CUBIC FEET PER SECOND on an instantaneous basis.

This permit is issued subject to, and also incorporates the terms and conditions set forth in the State Engineer's Order No. 1087, Order Adopting Rules For Well Spacing and Modification of Regulations For Water Well and Related Drilling (January, 1990) In The Heretofore Designated Kelley Creek Ground Water Basin (4-66), dated December 30, 1993, on file in the office of the State Engineer.

This permit is issued subject to and also incorporates the terms and conditions set forth in the State Engineer's Ruling No.3606, dated May 19, 1989.

This permit is issued subject to Stipulation to Withdraw Protests of Lavar Murdock to Application Nos. 58041-58044, inclusive, dated October 14, 1994, and further issued subject to Amendment to Stipulation to Withdraw Protests dated December 21, 1994, on file in the office of the State Engineer in 58041.

A monthly report shall be submitted to the State Engineer within 15 days after the end of each calendar quarter which shall include: the volume of water pumped from each well, the measurement of pumping water level (drawdown) from each production well and each monitoring well, the volume of water consumptively used for mining and milling uses projectwide, and the amount of water discharged for infiltration.

A method that estimates the amount of evaporative losses from the discharge system shall be submitted with the monthly report. The evaporative losses will be considered as part of the combined duty for consumptive purposes.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.
